

# Abdul Matin

CV Research

**Student at Department of Computer Science and Engineering**

**Chittagong University Of Engineering and Technology**

I'm interested in Computer Programming, Internet programming and Algorithm. I code in C++ and Java. I know basic html and css. I developed a few applications with Java and Javafx and this website itself was developed by me. I've solved more than 400 problems so far in different Online Judges. I love Mathematics and writing poems too. I attend Online and Onsite contests. Our ([CUET AWM](#)) best position was 29th in [IUPC of MIST 2019](#). Currently I'm attending in two Algorithm courses online, [Algorithms, part 1 by Princeton University from Coursera](#) and [MIT 6.006](#).

## Skills

- C++ and Java
- HTML5, CSS, Javascript
- MaterializeCSS, Bootstrap, Skeloton and ReactJS
- VCS(git with github)
- Competitive Problem Solving
- Data Structure and Algorithm
